

TUTORS FORUM

OPERATING MODEL: ILM NEXUS'S #1 FINANCIAL ENGINE

Prepared by TIHAAMAH CONSULTING

The Marketing & Strategy Arm of TIHAAMAH GROUP LTD

1. Why Tutors Forum Is the #1 Financial Engine

Unlike NGO (funding-dependent), Public Relations or Research (credibility-only), Tutors Forum sells a direct, tangible, repeat-purchase service — education. Students and clients pay for outcomes, and that payment is recurring by nature: a student enrolls for a term, a subject cycle, or a skill track, not a single session. That recurrence is what makes it the most predictable earner among all seven departments.

2. Two Tracks Under Tutors Forum

Track A — Academic Tutoring

WAEC/JAMB prep, core subjects, Islamic studies — the traditional tutoring base.

Track B — Digital Skills Academy

Social Media Management, Front-End Web Dev, AI Automation, Graphic Design, Video Editing, Intro to Cybersecurity, Digital Marketing, Program Management, Data Science/Analysis, and Content Creation. This track carries more revenue weight — digital skills courses command higher prices, attract working adults (not just students), and carry natural upsell and certification value.

3. Tier Framework (Applies Across All Courses)

Tier	What's Included	Format
Basic	Core curriculum, group cohort, recorded session access	Large group (20-30)
Standard	Core + live weekly mentorship, project feedback, certificate	Small group (10-15)
Premium	Everything in Standard + 1-on-1 mentorship, portfolio building, job/internship placement support	Small group or 1-on-1

4. Suggested Course Pricing (Per Full Course Cycle)

Course	Duration	Basic	Standard	Premium
Social Media Management	4 wks	₦25,000	₦45,000	₦75,000
Front-End Web Dev	10 wks	₦60,000	₦110,000	₦180,000
AI Automation	6 wks	₦50,000	₦90,000	₦150,000
Graphic Design (Mobile & Laptop)	6 wks	₦35,000	₦65,000	₦110,000
Video Editing	5 wks	₦35,000	₦60,000	₦100,000
Intro to Cybersecurity	6 wks	₦45,000	₦80,000	₦130,000
Digital Marketing	6 wks	₦40,000	₦70,000	₦120,000
Program Management	6 wks	₦45,000	₦85,000	₦140,000
Data Science / Analysis	10 wks	₦65,000	₦120,000	₦200,000
Content Creation	4 wks	₦25,000	₦45,000	₦75,000

Flagship high-ticket courses: AI Automation, Data Science/Analysis, and Front-End Web Dev. These justify premium pricing because the earning potential for students is highest — which is what people are actually paying for.

5. Delivery Model — Cohort-Based, Not Rolling Enrollment

- Fixed cohort start dates (new intake every 4-6 weeks) — creates urgency and drives faster enrollment decisions than open rolling admission
- Cohort sizes capped per tier — protects quality and justifies the price gap between tiers
- Bundling option — e.g. Digital Marketing + Content Creation + Social Media Management at a discount, since these combine naturally into a full personal-brand/agency skillset and increase average revenue per student

6. Revenue Math — A Simple Model

Running just 4 mid-tier, higher-volume courses per cohort — Social Media Management, Graphic Design, Digital Marketing, Content Creation — at Standard tier (~₦55,000 average) with 25 students each:

- $4 \text{ courses} \times 25 \text{ students} \times \text{₦55,000} = \text{₦5,500,000}$ per cohort
- 6 staggered cohorts a year = ₦33,000,000/year from these 4 courses alone

Add the higher-ticket courses (Front-End Web Dev, Data Science, AI Automation, Cybersecurity, Program Management) even at lower volume (10-15 students, Premium tier), and Tutors Forum comfortably becomes the department carrying the group.

7. Operational Structure

- Tutor Recruitment & Vetting — structured pipeline (application → subject test → demo class → onboarding) to keep quality consistent
- Scheduling System — booking/calendar system so classes don't clash and capacity is visible
- Quality Control — session feedback forms, periodic student/parent check-ins, tutor performance reviews
- Billing & Collections — clear, enforced payment cycle (upfront per term, or subscription auto-renew) — this is where most tutoring businesses leak money if left informal

8. How It Feeds Off the Other Departments

Research & Innovation

Supplies the curriculum backbone, so Tutors Forum isn't just generic lessons but content with academic credibility behind it.

Creative Studio

Produces the marketing materials, class promo content, and parent-facing branding that make enrollment attractive.

Public Relations

Pushes visibility — success stories, exam/result wins, testimonials — the single best driver of new enrollments.

Campus Presidential Council

Becomes a built-in recruitment channel, reaching students directly where they already are.

9. Growth Levers

- Result-based marketing — publicizing exam pass rates and grade/skill improvements builds trust faster than ad spend
- Referral incentives — parents/students who bring in others get discounts — cheap growth for a service business
- Retention over acquisition — cheaper to keep a paying student for 3 terms than find 3 new ones; the quality control loop matters more than marketing long-term
- Upsell path — a student starting on Basic can be moved to Premium 1-on-1 as trust builds, increasing revenue per customer without needing new customers

10. What Makes This Sustainable

- Tutors are subject-matter practitioners, not just teachers — an active developer teaching Front-End Web Dev also builds ILM NEXUS's credibility as a real skills hub
- Certificates on completion increase perceived value and generate free marketing when students share their achievement
- Job/portfolio support at Premium tier drives referrals, because it's the tier that changes someone's income, not just their knowledge

Bottom Line

Tutors Forum works as the #1 engine not because it's flashy, but because it's the only department selling something people need repeatedly and will pay for without persuasion — everything else in ILM NEXUS should exist to make Tutors Forum more trusted, more visible, and easier to enroll in.
